DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1 - 6 in the reply filed on June 22, 2009 is acknowledged. The traversal is on the ground(s) that the lack of unity rejection is improper and US Publication 2004/0003883 is not obvious over the claimed invention. This is found persuasive, and the restriction is being withdrawn.

Drawings

2. The drawings were received on September 8, 2006. These drawings are accepted by the Examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please delete the Abstract and replace it with the following:

--Disclosed is a heat-peelable pressure-sensitive adhesive sheet that can prevent the deformation of a pressure-sensitive adhesive layer caused by pressurization, further reduce chipping in grinding and cutting processes, be easily peeled off from a processed article after processing, and can be easily applied to an adhered at ordinary temperature. The heat-peelable

Art Unit: 1794

pressure-sensitive adhesive sheet includes a substrate, and a heat-expandable pressure-sensitive adhesive layer arranged on or above at least one side of the substrate, the heat-expandable pressure-sensitive adhesive layer containing a foaming agent and having a shear modulus (23°C) in an unfoamed state of 7×10^6 Pa or more. The adhesive sheet further includes a pressure-sensitive adhesive layer being arranged on or above heat-expandable pressure-sensitive adhesive layer, wherein the pressure-sensitive adhesive layer has a shear modulus (23°C) of less than 7×10^6 Pa and a thickness of 0.01 to 10 μm .--

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest heat-peelable pressure-sensitive adhesive sheet. The independent claims identify the uniquely distinct features of a substrate that include a heat-expandable pressure-sensitive adhesive layer arranged on or above at least one side of the substrate wherein the heat-expandable pressure-sensitive adhesive layer contains a foaming agent and has a shear modulus (23°C) in an unfoamed state of 7×10^6 Pa or more with a pressure-sensitive adhesive layer being arranged on or above the heat-expandable pressure-sensitive adhesive layer and having a shear modulus (23°C) of less than 7×10^6 Pa. The closest prior art of record, USPGPub 2004/0003883, discloses a pressure-sensitive adhesive sheet, which either singularly or in combination, fails to anticipate or render obvious the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 1794

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (571)272-1496. The examiner can normally be reached on Mon.-Fri. from 10:00-6:30.
